

Cove Collection
by Knoll™

**Cove Collection
by Knoll™**

An expertly crafted, beautifully minimalist collection for the private office.

Designed by Dan Grabowski, Cove Collection by Knoll offers thoughtful, scalable options for the modern private office. Refined and refreshingly light in scale, each element in the collection is skillfully constructed with the warmth and precision for which Knoll is renowned. Cove Collection by Knoll is crafted from honest materials: premium metal, back painted glass, and fine wood veneer that brings the natural world inside.

OPPOSITE Cove Collection by Knoll is efficiently configured to allow a private office to flex between individual focused work and collaborative meetings.

For every workspace need

Cove Collection by Knoll offers a comprehensive scope of components to create a wide range of private and shared office environments. The collection's variety of aesthetic options and high level of personalization make it easy to create spaces that support today's workstyles across a spectrum of client needs.

Refined Design

Cove is the third of Dan Grabowski's designs for Knoll, taking its name from the natural inlets that provide shelter from the sea. Its essential quality is refinement: the Cove Collection has a slim profile, minimalist construction, and beveled edges. Deftly concealed cable management offers an uncluttered sightline, and a plinth base gives each piece a continuous line from the top edge to the floor.

Versatile and Scalable

At once approachable and elevated, Cove can be configured in a variety of ways to create private offices within a larger workspace. It can be scaled from a modest office up to an expansive executive suite. Components include credenza storage, overheads, shelves, wall panels, fixed and height-adjustable desks and technology cabinets—all available in an array of sizes and combinations.

TOP A height-adjustable peninsula with an elegant waterfall surface provides a suitably refined place for individual work or collaborative meetings.

BOTTOM The warmth of the quality veneers make it easy to create harmonious shared spaces, whether it's two people in a dedicated office or multiple hybrid workers who are in the office part-time.

“The real beauty of Cove Collection
by Knoll is on the inside.”

management and easy routing keeps
power and data wires out of view.

Dan Grabowski

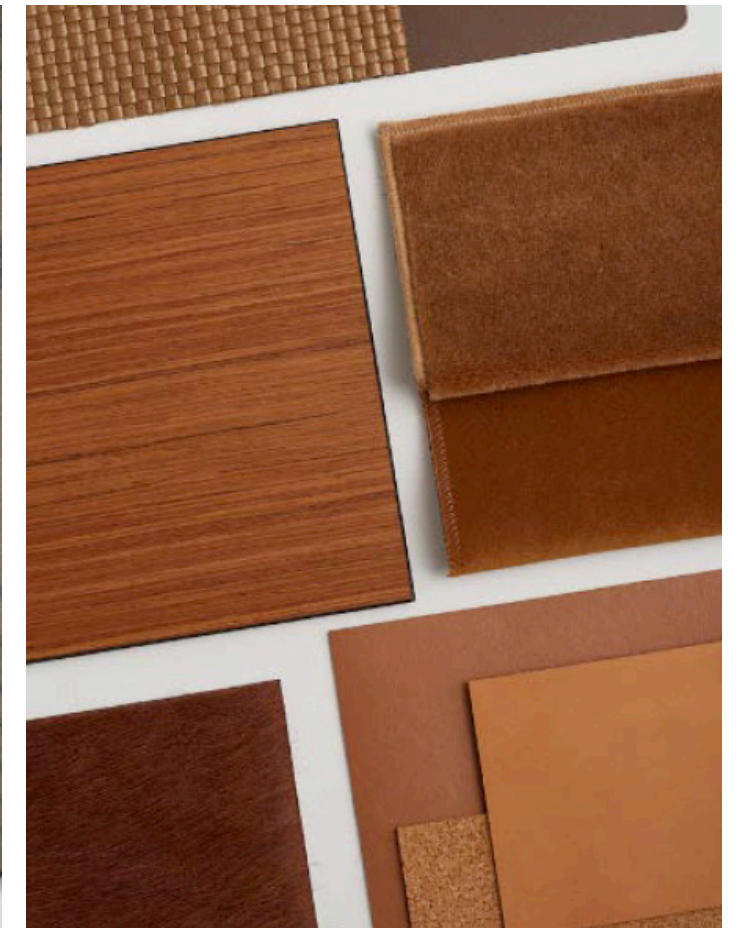

Designer bio

Born in Detroit, Michigan, Dan Grabowski grew up fascinated by cars, and attended the preeminent school for automotive design in the United States, The College for Creative Studies. While studying the work of Harry Bertoia as a college student, he was inspired to design things that were as beautiful as they were functional, honing his meticulous attention to the smallest detail. Early in his career he designed consumer goods ranging from power tools to infant care products, but when he began designing furniture, he found his calling. Grabowski is especially passionate about case goods, as evidenced by the elegant aesthetics of Cove Collection by Knoll.

Knoll craftsmanship

Elegant and refined, Cove Collection by Knoll is emblematic of the skilled woodworking, high quality materials, and fit and finish that have been Knoll signatures since 1938. Today, Knoll seamlessly combines technology and craftsmanship to create beautiful products of enduring quality. The collection's design takes full advantage of the Knoll wood finishing process, including the careful selection of pieces of veneer from the same flitch, and the processing of individual components all at once.

ABOVE Cove Collection by Knoll is offered in a materials palette designed to add warmth and elegance to the contemporary workplace.
